Things you need to know before the Hackathon

‹WCC /›

What do you need for the day of the event?

Thank you for being part of the WeCanCode Hackathon 2022. We are just a few days away from the event and here are all the details you need to know:

For Coding

**01** Your own laptop with all the tools configured.

02 Headphones for better concentration.

03 Extra accesories like keyboards, mouses and monitors.

Personal Care

01 Sleeping bag or tent

* During the event you will have a resting area.

02 Tooth brush and toothpaste.

03 Extra clothing (Optional)

General Recommendations for the Event

01 WeCanCode's venue will be in CETYS and it has a Behaviour Code we invite you to read.

02 **Registration starts at 2:30 PM.** You must show an official ID to access the venue.

Note: departures are not allowed between 10PM and 6AM.

03 **If you're a minor, you must arrive with a parent or tutor and a Minor Permission signed,** plus a copy of their ID and phone number – otherwise, you'll not be allowed to participate.

04 Don't forget your laptop and everything you need to work. Make sure to have all the software you may need already installed, otherwise you'll lose time during the event.

05 We will provide food, drinks and snacks during the event so you don't have to leave the venue.

06 We suggest that you bring a thermo for your beverage, this will protect everybody's computers.

07 We will have a Tech Lab with hardware devices you can use throughout your project. We recommend an early arrival so you can set aside what you would like to use.

08 Remember that WecanCode Hackathon 2022 is based on MLH behavior code. Please read the code before the event

MLH - Behavior Code

09 We recommend that you bring comfortable clothes, extra change of clothing, personal care products and whatever else you like to rest, like sleeping bags, blankets and pillows.

10 DO NOT bring pre made code. Teams with premade code will be disqualified from the hackathon.

11 There aren't enough parking spaces in the venue, so we strongly suggest considering an Uber, Didi or family/friend to give you and your team a ride.

Schedule and Itinerary

Friday
